Nairobi, Kenya | [faith.kirigi@gmail.com](mailto:faith.kirigi@gmail.com) | [faithkirigi.github.io](https://github.com/faithkirigi) | [linkedin.com/in/faith-kirigi](https://linkedin.com/in/faith-kirigi)

## PROFESSIONAL SUMMARY

---

Fraud and Risk Analyst with 4+ years of experience across fraud investigation, transaction monitoring, and financial analytics in high-volume online payments environments. Combines rules-based investigation expertise with hands-on machine learning (94% accuracy fraud classification model) to cut fraud losses and processing times. Delivered a 30% reduction in fraud losses, cut withdrawal processing time from 6 hours to under 2, and improved cross-functional response time by 50%.

## CORE SKILLS

---

**Technical:** SQL (advanced queries, joins, aggregations, window functions, data pipelines), Python (Pandas, NumPy, feature engineering, MongoDB), Power BI (dashboards, KPI tracking), Excel (advanced formulas, pivot tables)

**Domain:** Fraud detection & investigation, transaction monitoring & anomaly detection, chargeback analysis & dispute resolution, fraud trend analysis, financial analysis & forecasting, data quality control, KPI development

**Platforms:** MySQL / PostgreSQL, Power BI, Jupyter Notebook

## PROFESSIONAL EXPERIENCE

---

### Sportserve - Fraud Investigation Analyst

Jan 2026 – Present | Promoted from Fraud & Risk Analyst

- Lead end-to-end investigations across approximately 1,000 high-volume online payment transactions monthly, resolving an average of 30 cases per week by analyzing customer behavior, transaction flows, and risk signals
- Investigate chargebacks, disputes, and scam-related cases through root-cause analysis, contributing to a 30% reduction in fraud losses
- Drove recovery and prevention of fraud losses of significant value over a 6-month period through improved case resolution and pattern detection
- Partnered with Payments, Development, and Customer Service teams to refine fraud detection logic, cutting customer response time by 50%
- Analyze transactional datasets using SQL and Python to detect anomalies and emerging fraud typologies, translating findings into policy and control updates

### Sportserve - Fraud & Risk Analyst

Jan 2025 – Dec 2025

- Built SQL-based monitoring pipelines that cut average withdrawal processing time from 6 hours to under 2 hours, with approval decisions averaging 3.95 minutes per withdrawal
- Authored SOPs that standardized fraud review output across a 16-person team and improved overall efficiency
- Automated scheduling workflows, saving approximately 8 hours of manual work per month
- Developed and tracked fraud/risk KPIs (fraud rate, false positives, approval rate, loss trends) to enable data-driven performance monitoring
- Designed and optimized complex SQL queries supporting fraud detection and operational decision-making across high-volume transaction data

### Jumia Kenya - FinOps Analyst

Nov 2023 – Jan 2025

- Proactively coordinated with vendors and finance teams across 300+ vendor accounts weekly, flagging reconciliation issues ahead of cycle close and reducing reconciliation delays
- Built Power BI dashboards used by the finance team to visualize financial performance and control metrics for FP&A and budgeting processes
- Developed SQL-driven data models supporting financial controls and reconciliation across multiple accounts

### Cossim Limited - Account Manager

Aug 2022 – Oct 2023

- Managed financial records, invoices, and payment tracking across 24 hubs and 100+ employees, maintaining strong data accuracy
- Identified discrepancies and implemented process improvements that strengthened financial reporting reliability

### Cossim Limited - Finance Intern

May 2022 – Aug 2022

- Supported expense tracking and record management, ensuring accuracy and consistency across financial documentation

### **CloudFactory - Data Analyst / Team Lead (Part-time/Contract)**

*Feb 2021 – Oct 2024*

- Led a QA team of 5-6 analysts, building validation pipelines and SQL-based anomaly checks across datasets exceeding 50,000 records
- Implemented structured QA frameworks translating business requirements into enforceable data integrity rules
- Documented data models and validation processes to support long-term scalability

### **PROJECTS**

---

- Fraud Detection Model (Python): built and evaluated a classification model achieving 94% accuracy and 98% AUC-ROC on transactional data
- Fraud Investigation Case Study: conducted EDA and pattern analysis distinguishing fraudulent vs. legitimate transactions to support risk-based monitoring strategies
- Transaction Analytics Dashboard (Power BI): built an interactive dashboard integrating SQL-based data extraction to surface transaction trends, KPIs, and fraud monitoring metrics

### **EDUCATION**

---

Bachelor of Arts, Economics & Business Studies, KCA University

### **CERTIFICATIONS**

---

- Google Data Analytics Professional Certificate
- Applied Data Science Lab, WorldQuant University
- Data Science & Analytics Training, Nawiri Tech
- Career Essentials in Data Analysis, Microsoft & LinkedIn
