Professional Summary

Data Analyst and Fraud Risk Analyst with experience in transaction analysis, fraud detection, and risk monitoring across high-volume financial systems. Skilled in SQL, Python, and data visualization, with a strong focus on identifying behavioral fraud patterns and translating data insights into actionable risk controls.

Currently building end-to-end analytics projects, including fraud detection case studies, to bridge data analysis with real-world financial risk applications.

Core Skills

- Fraud Detection & Risk Analysis
- Transaction Monitoring & Investigations
- SQL Data Analysis (Advanced)
- Exploratory Data Analysis (EDA)
- Data Visualization (Power BI, Python)
- Fraud Trend & Behavioral Analysis
- Risk Metrics & KPI Monitoring
- Dashboard Development
- Data Quality & Validation
- Cross-Functional Collaboration

Technical Skills

Languages & Tools:

- SQL (advanced queries, data extraction, analytical pipelines)
- Python (Pandas, Matplotlib, Seaborn)
- Power BI
- Excel

Competencies:

- Fraud Detection & Risk Analytics
- Data Analysis & Visualization
- Large Dataset Processing
- KPI & Risk Reporting

Projects

Fraud Investigation Case Study

- Conducted transaction-level analysis to identify patterns associated with fraudulent activity
- Analyzed key fraud signals including transaction velocity, device trust score, and geographic inconsistencies
- Performed feature exploration, correlation analysis, and behavioral segmentation
- Developed data-driven insights to support fraud detection and monitoring strategies
- Tools: Python, Pandas, Seaborn, Matplotlib

Professional Experience

Fraud Operations Analyst

Sportserve | Jan 2026 – Present

- Lead end-to-end fraud detection and prevention across online payment transactions
- Analyze large transactional datasets using SQL to identify fraud patterns and anomalies
- Design and maintain fraud detection logic and risk control frameworks
- Monitor fraud trends and optimize detection rules to reduce losses and false positives
- Investigate account misuse, scam activity, and abnormal transaction behavior
- Translate fraud insights into actionable recommendations for product and risk teams
- Collaborate with Product, Payments, and Engineering teams to improve fraud controls

---

Fraud & Risk Analyst

Sportserve | Jan 2025 – Dec 2025

- Built SQL-based pipelines to monitor fraud risk across high-volume datasets
- Developed queries supporting fraud detection, reporting, and automated controls

- Monitored key risk metrics: fraud rate, chargebacks, approval rates, and false positives
- Translated risk requirements into automated monitoring rules and alerts
- Documented fraud logic and workflows to support scalability

---

FinOps Analyst

Jumia Kenya | Nov 2023 – Jan 2025

- Analyzed financial and transaction datasets to support monitoring and reporting
- Built dashboards and KPIs for budgeting and operational performance
- Developed Power BI dashboards to track transaction trends and anomalies
- Identified process gaps and improved financial data reliability

---

Data Analyst / Team Lead

CloudFactory | Feb 2021 – Oct 2024

- Built data validation and quality control pipelines for large datasets
- Designed SQL queries to detect anomalies and enforce validation rules
- Implemented structured QA frameworks for data accuracy
- Documented data models and validation processes

Education

Bachelor of Arts — Economics & Business Studies
KCA University

Applied Data Science— WorldQuant University

Professional Development

- Data Science & Python Programming — Nawiri Tech
- Google Data Analytics Professional Certificate — Google (Coursera)
